OVERALL MARKET SENTIMENT

Since the beginning of 2022 more than half a trillion dollars has been shed from the market capitalization of cryptocurrency, and more than a trillion if we adjust that timeline back to November of 2021. Uncertainty continues to spread as investors fear what lies ahead regarding regulations. Such uncertainty has caused many to shift their funds into stablecoins and watch as things progress from the sidelines. The Biden Administration is rumored to have plans to order cryptocurrency regulatory framework within the coming weeks as a matter of national security. Whether we rise or fall will depend widely on how the U.S. government decides to proceed as other countries will look to the U.S. as a weathervane to determine how they will choose to proceed with their regulatory policies. Working towards formulating a solution that will allow the government to maintain fiscal control while not simultaneously stifling blockchain innovation, perhaps the biggest technological advancement this generation will witness, has proven to be a difficult task. If you categorize yourself as a crypto enthusiast you may see these prices as a great entry point for long term position, however the bottom line here for anyone considering entering this market is to do so with extreme caution. While most of us are here because we believe in the innovation that blockchain holds, change can ensue at anytime.

NFTs

Salty Pirates Crew

If you're looking to dive into NFT projects in 2022 Salty Pirates Crew (SPC) is a new one worth mentioning. SPC is a collection of 3,000 PFP (Profile Picture) NFTs minted on the Ethereum network. Holding the NFT will eventually allow you the opportunity to stake and generate yield in the utility token SALT which will be used within the SPC ecosystem. The public sale went live on 1/24 and sold out in less than 2 hours with the NFT floor price increasing more than 3x from launch price. Cryptonairz hosted an AMA with Salty Pirates Crew on 1/17. If you were unable to attend and are interested in learning more about the project, check out the link to the YouTube recording in the "Incase you missed it" section.

Alien vs Human

If you enjoyed the well known Ethereum based NFT project Wolf Game, then you may be interested in Alien vs Humans. This project is a fork of the risk to earn (R2E) project Wolf Game on the Binance Smart Chain (BSC)! The mint went live on January 29th allowing you to enjoy the same type of game play as Wolf Game but with cheaper gas fees, and who doesn't love cheaper gas fees?!

NODE WORTHY

Universe Nodes

UNIV is the talk of the node space this week bringing a fun and refreshing twist to the DaaS market. This avalanche based project is the first of its kind to allow nodes to be transferred, exchanged, and traded in the form of an NFT! Universe calls their nodes planets - when you create a planet 75% of the UNIV tokens are burned making the coin more scarce with each node creation. You can choose to cash out your rewards or compound them for a bonus multiplier.

LAVA Nodes

LAVA is a hybrid NaaS project that runs on the avalanche network. Their model allows them to invest the treasury funds into validator nodes as well as private projects. What is unique about LAVA is the rewards are distributed to stakers and node holders in the form of the investments held by the treasury rather than receiving rewards in the native token.

LAUNCH PAD

Redlight Node District (RND)

Launch: Sunday 1/30

Node Bears NFT

Launch: 2/1

Unsure whether or not this is the project for you? Join us for an AMA with the Node Bears on Monday NFT team to learn more about it.

Lava Nodes

Launch: TBD

T.A. COURSE

Free For All Members!

Are you new to Technical Analysis, and interested in learning more? join our T.A. expert Zek on Saturday February 5th @3pm EST for the third class in a six part series. If you missed the first two classes, that's ok! We've got you covered. Check out "Incase You Missed It" to brush up on class #1. Class #2 recording is coming soon!
