## **This Week in Crypto**

Crypto has been on fire over the last few weeks with a total Crypto market cap touching approximately \$2.63 trillion dollars, which is a new All Time High (ATH) for the total Crypto market cap. This week Bitcoin (BTC) futures based Electronically Traded Funds (ETFs) were released by two different organizations Proshares and Valkyrie. On the first two days of the ETF release, Proshares traded more than 1 billion in assets, which was a record high for an ETF, however the Valkyrie release resulted in the opposite due to a drop in BTC price. For the latest passive plays we have discovered make sure to check out our socials. The Cryptonairz team has been growing in size and events, make sure to tune in on YouTube where we also host daily Crypto news, host various events with notable individuals and even post guides. ## New Projects

This week's new reviewed projects includes the following projects:

- Klima (KLIMA)
- Atlas (ATLAS)
- Sonar Token
- SolRazr (SOLR)

If you are interested in more details about this project please refer to the write ups in the discord or ask one of our moderators.

## StrongBlock Updates

StrongBlock has continued to expand the list of StrongBlock holders who can launch the new DVPN Sentinel nodes. StrongBlock has announced that it will be providing its Node-as-a-Service (NaaS) in collaboration with Fantom (FTM), Polygon (MATIC) and rumor has it Binance (BSC). In the weekly AMA David Moss mentioned that Strong is working on node migration for individuals who have had compromised wallets. Lastly, it was mentioned that a form of fractional node ownership is in the works and that Strong is working on claim routing which will allow users to roll over rewards to new nodes without having to pay fees.
